CAREER OBJECTIVE:

As a Software Engineer and Project Architect, I strive to craft transformative digital solutions by combining my expertise in JavaScript, Python, React, Django, and Odoo. Driven by a passion for innovation, I aim to architect impactful systems that empower businesses and users alike, while continuously challenging myself to grow in a dynamic and collaborative environment.

EXPERIENCE:

Software Engineer | Ogroni Informatix Limited Oct 2024 - Present

- **Architected and developed over 80 custom Odoo modules in Python and XML, designing bespoke data models and business logic to meet complex enterprise requirements.**
- **Engineered full-stack Odoo ERP solutions (v13-18) across modules like Accounting, Sales, Inventory, and Manufacturing, leveraging the Odoo ORM and API.**
- **Executed complex data and module migrations, successfully upgrading 50+ modules from v17 to v18 and 30+ from v13 to v18, ensuring data integrity through code refactoring and rigorous testing.**
- **Developed dynamic, responsive UI/UX features and custom web components using the Odoo Web Library (OWL 2.0+) and JavaScript.**
- **Built and integrated RESTful APIs for seamless third-party system communication and created custom BI dashboards and real-time reports (XLSX/PDF) directly from PostgreSQL.**
- **Delivered full-scale ERP implementations for major clients including Nasir Group, Jalalabad Metal Limited, and Circle Industry BD.**

Full Stack Developer (Team Lead) | Dev Cluster | Jun - Oct 2024

- **Architected and led the development of a resilient, microservices-ready platform using Django and React.js.**
- **Designed and implemented normalized PostgreSQL database schemas to ensure data integrity and optimal performance.**
- **Managed the full project lifecycle in an Agile/Scrum environment, including task delegation, code reviews, and ensuring on-time delivery.**
- **Established and automated CI/CD pipelines, managed server deployment, and enforced system security best practices.**
- **Served as the primary technical liaison for clients, translating business needs into technical solutions to meet strategic goals.**

Software Engineer | Khan Enterprise | Jan - May 2024

- **Engineered business-critical features by architecting decoupled, event-driven backends (Django, Node.js) and high-performance, isomorphic frontends (Next.js).**
- **Boosted application scalability by implementing advanced query indexing (MySQL, MongoDB), data sharding patterns, and a Redis caching layer to mitigate high-traffic bottlenecks.**
- **Streamlined the development lifecycle by containerizing applications with Docker and enhancing the CI/CD pipeline with automated testing**

TECHNICAL EXPERTISE:

Frameworks : Odoo (v13 – v18), Django, React, Next.js

Languages : JavaScript, Python, C++, C, PHP, TypeScript

Frontend : Redux Saga, CSS, OWL 2.0, React-Router, Tailwind, Firebase, Firestore, Qweb, XML, HTML

Backend : Node.js, Django Rest Framework, RESTful APIs, Express.js, Knex, Django ORM, JSON-Server

Database : PostgreSQL, SQL, MySQL, Redux-Reselect, Redis, MongoDB, Firebase

Tools : Git, npm, yarn, GitHub, Postman, VSCode, MySQL Workbench, DataGrip, Xampp, PyCharm

Education:

National University, Bangladesh
(Graduated - March 2024)
B.Sc. (Hon.) in Computer Science & Engineering (CSE)

- Final Semester **CGPA: 4.0**
- Final Year Average **CGPA: 3.89**
- Overall CGPA: 3.38

Courses:

- **Phitron : 14 months | CGPA: 3.33**
- **Programming Hero: Recommendation Letter**
- **ISTT ACM Student Chapter : Certificate**
- **Data Structures & Algorithms**
- **Numerical Analysis**
- **Data Visualization**
- **DevOps**

Languages:

- English - **Fluent**
- Hindi - **Proficient**
- Bengali - **Native**

and security scans, improving deployment velocity.

- **Mentored junior engineers on advanced design patterns and SOLID principles, establishing rigorous code review protocols to elevate code quality and maintainability.**

Python Developer (Odoo) intern | Bista Solutions Inc. | Oct - Dec 2023

- **Developed and enhanced custom Odoo modules using Python to automate complex business logic and streamline workflows.**
- **Designed and implemented user-friendly UI views and forms with XML, ensuring a consistent and intuitive user experience.**
- **Managed the end-to-end lifecycle for ERP customizations, from requirements analysis and iterative development to final testing and deployment.**
- **Improved code quality and system stability by conducting peer code reviews, performing bug triage, and applying SOLID principles and design patterns.**

Junior Software Engineer | Khan Enterprise | Feb 2022 - Sep 2023

- **Engineered and delivered end-to-end solutions in a small developer team, building new systems and enhancing existing applications in a fast-paced, client-centric environment.**
- **Developed responsive single-page applications using React.js and Next.js, managing complex state and server-side data with Redux Toolkit and React Query.**
- **Architected and built scalable RESTful microservices with Node.js (Express) and Python (Django, DRF), adhering to SOLID principles and clean architecture.**
- **Designed and optimized relational (MySQL) and NoSQL (MongoDB) database schemas, utilizing Django ORM and Mongoose to ensure data integrity and performance.**
- **Improved code quality and streamlined the development lifecycle by implementing test-driven development (TDD) with Jest and pytest-django and automating deployments on Netlify.**

Extra Curricular Activities:

- National Level Badminton Player (2016)
- Won Multiple Badminton **Tournaments**
- Guest Speaker on Programming Hero's **Live Facebook Event** (2023)
- Champion Of **Intra University Programming Contest** (2019)
- Volunteer at Jaago Foundation (2014)
- **Online Teacher** (Programming & Math)
